

CP10

Optical Probe for Meter Communication

The CP10 Optical is a versatile optical probe featuring a USB interface, widely used in meter communications for tasks such as data reading, parameterization, production line testing, on-site servicing, and more. Its cutting-edge technologies and broad applicability set it apart as a standout in the family of optical probes. Among them, the CP10 model exemplifies ingenuity at its finest.

Specifications:

- **Standard** : Fully Compatible with IEC 62056-21 standard.
- **Interface**: Infrared optical.
- **Baudrate** : Up to 19200bps.
- **Holding** : Strong magnetic adhesion
- **Connection** : USB
- **Cable**: 2 meters
- **Wavelength**: 940nm
- **Indication visual** : 2 LED (Tx,Rx)
- **Enviroment** : -10°C ~ 60°C
- **Casting Material** : ABS
- **Dimension (φxH)** : appox 32x28 mm

Application

- Meter reading, parameterization
- Production line testing
- On-site servicing
